

FY-2001 PROPOSED SCOPE OF WORK for:
Geomorphology Peer Review

Project #: 86

Lead Agency: Water Acquisition Committee

Submitted By: George Smith, Chairman
U.S. Fish and Wildlife Service
P.O. Box 25486, DFC, Denver, CO 80225-0486
Phone: (303) 236-5322
Fax: (303) 236-4224

Date: April 11, 2000

Category:

- ☒ Ongoing project
- ☐ Ongoing-revised project
- ☐ Requested new start
- ☐ Unsolicited proposal

Expected Funding Source:

- ☐ Annual funds
- ☐ Capital funds
- ☒ Other (Section 7)

I. Title of Proposal:

Peer Review of Scopes of Work and Draft Reports Containing a Geomorphological Component for the Colorado and Green Rivers.

II. Relationship to RIPRAP:

RIPRAP Item Number:

Colorado River Action Plan: Mainstem

I. Provide and Protect Instream Flows

Green River Action Plan: Mainstem

I. Provide and Protect Instream Flows

Green River Action Plan: Yampa and Little Snake Rivers

I. Provide and Protect Instream Flows

III. Rationale/Problem Statement:

Geomorphology has become an important aspect of flow recommendations developed by U.S. Fish and Wildlife Service biologists. High flows are often recommended based on the need to maintain a channel morphology necessary for providing backwater and main channel habitats for endangered fishes. In addition, channel monitoring is becoming increasingly important as the Recovery Program moves from a research oriented program

to implementation of projects such as coordinated reservoir operations, re-operation of dams, instream flow protection, and levee removal. The Recovery Program's channel monitoring program is expanding with new and ongoing projects to be reviewed each year. To ensure that future geomorphology and channel monitoring projects are designed properly, a peer review process is being proposed for these types of work.

IV. Project Goals and Objectives:

Implementation of a peer review panel that will:

- 1) Review and provide comment on all new scopes of work that contain a geomorphological component. Determine if the proposed methodology will achieve the objectives of the scope, and if not, make recommendations on how to modify study design so the objectives can be accomplished efficiently and effectively.
- 2) Provide review of draft reports that contain a geomorphological component as part of the Program's approved peer review process. Provide comment on the use and interpretation of data.
- 3) Other peer review panel activities for FY-2001 will include but not be limited to, review of the geomorphological-related components of the Recovery Program projects and other reports refereed to the panel by the Biology or Water Acquisition Committees.

V. Study Area:

Colorado and Green Rivers.

V. Study Methods/Approach:

The peer review panel, established in FY-98, will continue to meet via telephone, at least semi-annually, to review scopes of work and annual completion reports, and on an as-needed basis, to respond to the application of geomorphology components of projects. Following the meetings, panel comments will be provided to the Water Acquisition Committee, the Program Director's office, and the principal investigator.

VII. Task Description and Schedule:

The panel will meet in May or June of 2001 to review 2002 Scopes of Work and provide comments and suggestions to improve the methodologies or clarity of the scopes of work. The comments from the panel will be provided to the principal investigator or the appropriate Recovery Program coordinator.

VIII. FY-2001 Work:

Deliverables: A report or series of reports in letter form will provide comments, constructive criticism, and ideas on:

- 1) adequacy of the proposed methodology for geomorphology aspects of the proposed Scopes of work (this includes prodding comments, criticism, and ideas on how channel monitoring can be accomplished effectively and efficiently); and
- 2) adequacy of the draft completion reports, with comment on whether or not the data used are appropriate and support the recommendations.

FY-2001 Budget:

A. Support for Peer Review Panel \$10,000

B. Budget Summary:

FY-2001	\$10,000
FY-2002	<u>\$10,000</u>
Total	\$20,000

X. Reviewers: N/A
